

Superlative
chair for superlative
performance

www.BDchairs.com

We are a leading name in the manufacturing of ergonomic office chairs in India, designed and developed by experts & manufactured at our high-tech facilities abroad. Established under the brand name of B&D, that essentially stands for Build & Design for Future, we have been consistently offering our customers a product range that is premium in quality, user-friendly, enhances efficiency and superbly balances aesthetics with functionality. Our chairs come at affordable costs, with a five years warranty. Additionally, as we are always well stocked, we deliver our customers' orders promptly.

B&D Chairs came into existence after a realization by the founder director that a right kind of seating at work improves user comfort and directly improves productivity at work. Hence, our chairs were designed after consultation with experts such as engineers, designers, architects, craftsmen and actual users. What resulted was chairs that were a fusion of biomechanics, aesthetics and user experience – chairs that eventually increased employee output at workplace, improving overall system performance.

While our brand serves various sectors pan India, that include large corporate, houses, small and medium scale businesses, BPOs and KPOs, banking and insurance sector, co-working spaces and individuals who work from home, to name just a few. We pride ourselves on offering a chair for every space and occasion that is ready to be delivered as per our clients' demands.

B&D Chairs are committed to enable people to do their best at their place of work with comfort and ease. With strongly built chairs that use a futuristic technology, B&D chairs are made for, and promise to be the future of India.

Vision

Our vision is to offer top quality office chairs that are manufactured using world class technology, material and designs, making them available at most reasonable rates.

Mission

Our mission is to offer ergonomically designed quality seating solutions at modest prices to all types of industries across India and the overseas market, while eventually being a reckoned as a strong, indigenous Indian brand in the global furniture segment.

ABOUT DIRECTOR

B&D started off as an enterprise based on the dream and vision of a young dynamic entrepreneur from India, Mr. Mukesh Jain. He was naturally inclined towards business, and has always believed in the vision of a self-reliant India. He was aware that a better seating leads to improved comfort and increased productivity, that ultimately helps progress the country's economy. Hence with his sharp eye for details and naturally hard working nature, he studied intricate aspects of designing and components and came up with a range of models suitable for contemporary offices. His motto is clear- to offer premium quality chairs at affordable prices to the Indian segment and eventually make a mark in the global furniture market. He brought many new innovation chairs in India for the first time.

Mr. Mukesh has always been forward thinking, as he plans to make his products as per the needs of the constantly evolving work spaces of the contemporary as well as futuristic world. Mr. Mukesh lays a great emphasis on research, and remains updated on latest technologies, materials and design trends. After all, it is his vision that continues to steer the innovation at B&D, as the essence of the vision is visible in our product range, as showcased in our catalogue that follows.

MY PROMISE

To deliver ergonomic, strong, longlasting, comfortable chairs for every work, every need and every budget.

Mr. Mukesh Jain
